Secure Mobile Banking Without Compromise

Mobile apps have changed the way people access banking services, and your bank cannot ignore this trend. How then do you design mobile banking that is not only useful, but secure? Simply leave the security solution to us. Wultra Mobile Security Suite is a software development kit (SDK) that will secure your mobile application quickly with minimal effort to integrate.
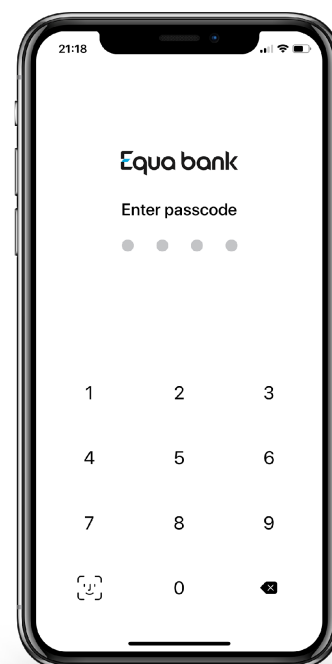

The solution can integrate with your mobile banking quickly and in a cost-efficient manner, making your mobile banking significatnly more secure and compliant with the PSD2 requirements on strong customer authentication (SCA).

Usability Through Security

We make sure that the additional security is reflected in a better user experience.

With Wultra Mobile Security Suite, your customers can easily sign in or confirm operations with a short PIN code or biometry (fingerprint scan or face recognition). They can sign contracts in the same easy way, and will even be able to see their account balance before signing in via widgets or on a smartwatch.

Since our technology bundles a mobile push server, your clients can be also notified in case anything needs their attention.
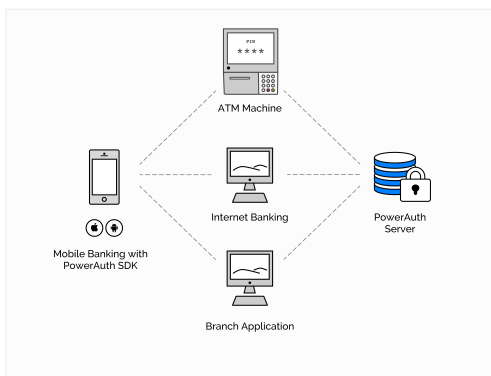

Key Features

- **Simple PIN or Biometry**
  Your clients can sign in and make payments with an easy-to-remember numeric password (PIN) or with a fingerprint scan or face recognition.

- **Flexible Activation**
  The mobile bank app can be easily activated and managed through internet banking, at a branch office, or via an ATM.

- **Support for Push Notifications**
  Inform your clients about important events in their account or send them one of your great deals.

- **Wearables and Widgets**
  Show an account balance or other essential data before even logging in via widgets or on a smartwatch.

- **Document Signatures**
  Signing a contract amendment with a private key signature has never been easier. Just enter the PIN, and it's done!

- **App Shielding**
  We will protect your apps against the mobile malware and various runtime attacks with a market leading RASP solution.
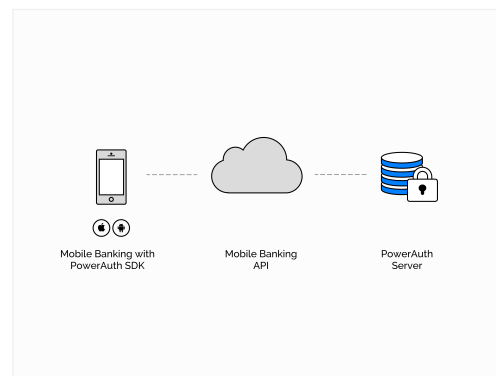

Solution Architecture

Device Activation

The solution can be integrated with a range of digital channels, allowing easy mobile banking activation.

Integration With the Bank API

Thanks to Java technology support, you can handle our solutions quickly and easily with your mobile API.

About Wultra

Wultra helps the leading European banks build secure digital channels. Our range of security-related software technologies covers the whole digital banking application stack, be it on the web or mobile. Security solutions by Wultra secure the best mobile banking in the Czech Republic, an open banking gateway for the retail bank with over 400k clients, or a premium banking for the most affluent clientele.
