Authentication And Authorization In One Place

Your bank is growing, and mobile and web apps are starting to accumulate. How do you deal with user authentication and payment authorization in these cluttered systems? Let's move authentication and authorization into one place with Wultra Authentication Web Flow! Not only will you simplify the technical side of your systems, but you also will fundamentally increase their security and user-friendliness. As a bonus, you will gain a solution helping you to comply with the security requirements of the PSD2 legislation.

Since the solution is open-source, it is effortless to integrate with open standards and platforms. As a result, your internet banking, mobile banking, or banking API security can be solved quickly, cheaply, and with minimum effort.

Two-Factor Authentication

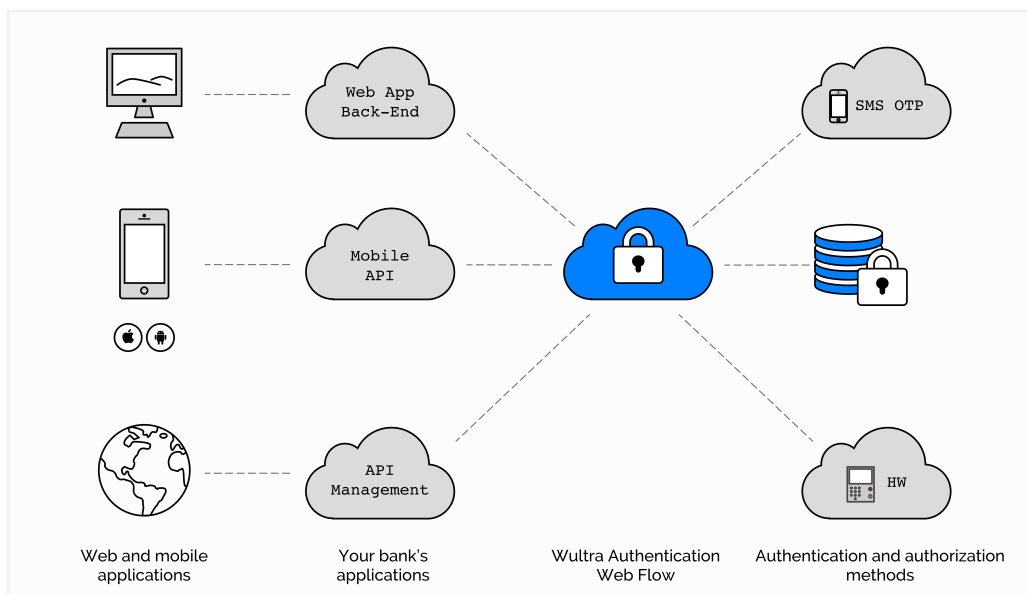

Wultra Authentication Web Flow is fully compatible with Wultra Mobile Token. Therefore, you can confirm operations quickly and conveniently with a simple mobile app. Verification is done using strong two-factor authentication (2FA). Of course, the solution remains flexible, and you can extend it with alternative authentication and authorization methods such as SMS or hardware token support.

Key Features

- **Unified Authentication and Authorization**
Your systems will be less cluttered, and users will place greater trust in them when signing in.
- **Support for Mobile Token**
Users can log in and confirm operations using a simple mobile app for iOS and Android.
- **Excellent User Experience**
The solution has a stunning user interface and since it is fast and convenient, will be popular with your users.
- **Open-source, Ready for Extensions**
You can easily add the alternative authentication methods to the solution, including support for new technology standards.
- **Simple Integration**
You can easily integrate Authentication Web Flow with your applications – web or mobile – via the OAuth 2.0 protocol.
- **PSD2 Ready**
The solution is designed to help you provide compliance with PSD2 legislation.

Solution Architecture

About Wultra

Wultra helps the leading European banks build secure and engaging digital channels faster. Our range of security-related software technologies covers the whole digital banking application stack, be it on the web or mobile platforms. Security solutions by Wultra secure the best mobile banking in the Czech Republic, an open banking gateway for the retail bank with over 300k clients, or a premium banking for the most affluent clientele.
