## Secure Mobile Banking Without Compromise

Mobile apps have changed the way people access banking services, and your bank cannot ignore this trend. How then do you design mobile banking that is not only useful, but secure? Simply leave the security solution to us! Wultra Mobile Security Suite is a software development kit (SDK) that will secure your mobile application quickly with minimal effort to integrate.

Our solution is also open-source, which means you can integrate it with your mobile banking quickly and cost-effectively, without worrying about slow support or unclear licensing terms, or fear of vendor lock-in.

## Useful Security

There is no need to secure an app no-one will ever use, and so we make sure that additional security is reflected in a better user experience besides just providing better security.

Your customers can easily sign in or confirm operations with a short PIN or fingerprint thanks to Wultra Mobile Security Suite. They can sign contracts in the same easy way, and will even be able to see their account balance before signing in via widgets or on a smartwatch.

Since our technology bundles a mobile push server, your clients can be also notified in case anything needs their attention.

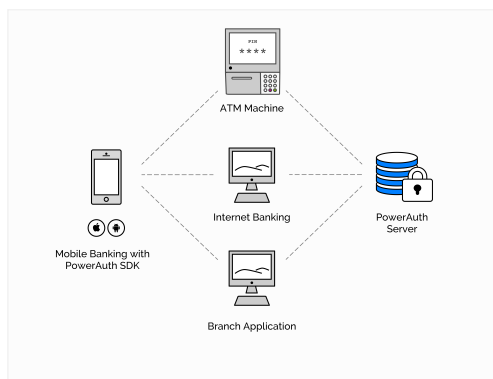

# Key Features

- **Simple PIN or Biometry**  
Your clients can sign in and make payments with an easy-to-remember numeric password (PIN) or with a fingerprint scan or face recognition.
- **Flexible Activation**  
The mobile bank app can be easily activated and managed through internet banking, at a branch office, or an ATM.
- **Support for Push Notifications**  
Inform your clients about important events in their account or send them one of your great deals.
- **Wearables and Widgets**  
Show an account balance or other essential data before even logging in via widgets or on a smartwatch.
- **Document Signatures**  
Signing a contract amendment with a private key signature has never been easier. Just enter the PIN, and it's done!
- **Secure Platform**  
We will inform you about clients using mobile devices with jailbreaks or root modifications.

## Solution Architecture

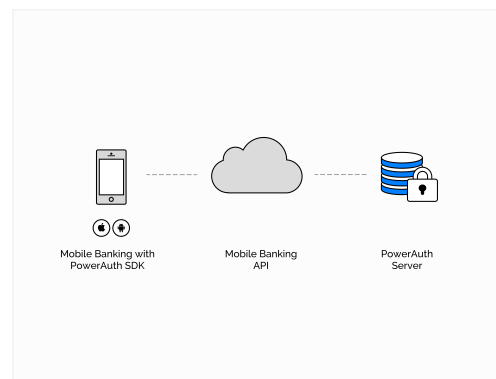

### Activation architecture

The solution can be integrated with a range of digital channels, allowing easy mobile banking activation.

### Integration with the bank API

Thanks to Java technology support, you can handle our solutions quickly and easily with your mobile API.

## About Wultra

Wultra helps the leading European banks build secure and engaging digital channels faster. Our range of security-related software technologies covers the whole digital banking application stack, be it on the web or mobile platforms. Security solutions by Wultra secure the best mobile banking in the Czech Republic, an open banking gateway for the retail bank with over 300k clients, or a premium banking for the most affluent clientele.
